

## CEMENT REMOVER

**Product Code : Q00051**

**Product Group: DERUSTING & DESCALING COMPOUNDS**

**Packaging: 25L**

### PRODUCT DESCRIPTION

CEMENT REMOVER is designed to instantly penetrate and disperse cement, providing complete cleaning of cement cargo deposits, dry cement stains and lime deposits. The product is capable of cleaning hard cement deposits perfectly while removing the possible existing rust. CEMENT REMOVER is water based and non-flammable containing powerful acids, inhibitors for surface protection and efficient detergents.

Its composition meets the criteria for not being harmful to the marine environment according to MARPOL Annex V.

### APPLICATION & DOSAGE

CEMENT REMOVER is recommended for removing cement deposits on cargo holds, as well as cleaning any cement stain on metal surfaces and articles.

Please refer to "EUROCHEM CARGO HOLD CLEANING " Brochure, which summarizes the solutions that EUROCHEM offers for tackling a variety of contamination and deposit problems.

Instructions are based on experience and are meant only as a guide since circumstances for each tank cleaning operation vary. They are not intended to interfere with the judgment of the vessel's responsible personnel.

Always add acids to water, never the reverse. Since CEMENT REMOVER is considered a highly corrosive product, operators must always consult the safety instructions table before use.

Always try to pre clean tanks with high pressure water, so as to remove large deposits and ensure an effective cleaning operation. Be sure that the surface has dried, before applying the chemicals, in order to avoid unnecessary dilution.

The product may be used undiluted or diluted, depending on the case. On heavy deposit built-up, use CEMENT REMOVER undiluted. For light depositions on large surfaces, use CEMENT REMOVER as a solution of 10-40% in water.

When the residues are met in difficult-to-clean places, such as corner cavities, tank skeleton inlets, etc., apply CEMENT REMOVER using conventional means such as brushes, mops, sponges or any other manual device, while cleaning in rapidly and irregularly. Allow 15 minutes for the product to act and then wash thoroughly with high-pressure water. If contamination persists, repeat the cleaning procedure, until the required result is obtained

### BENEFITS

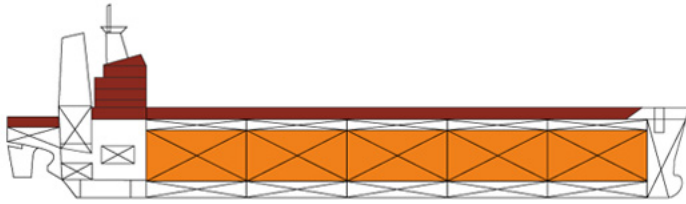

- Heavy duty acid-based product.
- Effectively removes cement / cement clinkers cargo deposits, dry cement stains and lime.
- Helps with removing possible existing rust.
- Quick and intrinsic action.
- Contains powerful inhibitors for surface protection.
- Safe to use on rubber/plastic.
- Water-soluble, non-flammable.
- Free from hydrocarbon or chlorinated solvents.
- Cost effective, easy to apply and use.
- Composition conforming to MARPOL Annex V.

**PROBLEMS SOLVED:**

- Cement / cement clinkers cargo deposits
- Dry cement stains
- Lime cargo deposits and stains

**APPLICABLE AREAS:**

- Cargo holds.

Safe to use on all metal surfaces and parts except aluminium, zinc, tin and its alloys. It is highly recommended to always test all cleaner solutions on a small area of tank coating, before full scale application.

**HEALTH SAFETY**

Please refer to the Material Safety Data Sheet and Product Label for specific information.

**LIMITATION OF LIABILITY**

EUROCHEM INTERNATIONAL standard terms and conditions of sale, available on request, apply and contain limitations on any liability that may be incurred by EUROCHEM INTERNATIONAL arising in any way from the sale and use of products supplied by EUROCHEM INTERNATIONAL.
