

CONDENSAMINE

Product Code : Q00007
 Product Group: BOILER WATER TREATMENT
 Packaging: 25L

PRODUCT DESCRIPTION

CONDENSAMINE is a concentrated liquid neutralizing agent for corrosion control in condensate and feed water systems.

APPLICATION, DOSAGE & CONTROL

CONDENSAMINE is a liquid, volatile alkaline amine which neutralizes the acid contaminants of condensate and feed water systems thus preventing the acid corrosion of system components. The most common cause of acid corrosion in condensate and feed water systems is the dissolved carbon dioxide (CO₂) being present in the water evaporating. CONDENSAMINE neutralizes these acids and maintains the condensate and feed water in an alkaline condition.

The condensate is tested of pH to determine the dosage level. The minimum pH should be 8.3, the optimum would be between pH 8.3 and 9.0.

A typical dosage for an average 10 metric ton system would be 0,5-1 liter per day. Below is a chart with the recommended limits for levels of treatments. They are not intended to replace either shipping company instructions or boiler manufacturers policy.

Increase or decrease the recommended dosage according to the chart below:

	Condensate pH form testing		
	<u>Less than 8.3</u>	<u>8.3 – 9</u>	<u>9.0 +</u>
All Boiler Systems	Increase Dosage by 25% for 72 hours and retest.	Satisfactory maintain dosage	Decrease dosage by 25% for 72 hour and retest

BENEFITS

- Neutralizes the acids occurring in the condensate system.
- Easy to use liquid treatment.
- Volatalizes and carries over with the steam and so is recycled. Dosage is economical and efficient.
- Used for protection of condensate and feed water systems in boiler systems of all pressures.
- Simple control test.

**HEALTH SAFETY**

Please refer to the Material Safety Data Sheet and Product Label for specific information.

LIMITATION OF LIABILITY

EUROCHEM INTERNATIONAL standard terms and conditions of sale, available on request, apply and contain limitations on any liability that may be incurred by EUROCHEM INTERNATIONAL arising in any way from the sale and use of products supplied by EUROCHEM INTERNATIONAL.
