

OIL DISPERSER

Product Code : Q00020
Product Group: OIL DISPERSERS
Packaging: 25L

PRODUCT DESCRIPTION

OIL-DISPERSER is a remarkable new product non-toxic, non-explosive, non-flammable, oil dispersant product containing surfactants and special dispersing agents.

PRODUCT USES

OIL-DISPERSER is a product for control of floating oil, either on fresh or salt water, especially around refineries, bulk terminals and marine loading terminals. Although principally used to disperse oil floating on the water, the product may be used for oil spills on ship decks, concrete pads, floors or bulkheads.

APPLICATION & DOSAGE

Spray the disperser over the oil in a heavy droplet spray. Allow to stand for a few minutes, then agitate with high pressure hose, working the stream back and forth in the oil slick. In some cases the propellers of a launch or boat will be sufficient agitation to break up the slick. Normally the expected dosage of disperser to fuel oil is one gallon of disperser to 8 or 10 gallons of fuel oil.

APPROVALS

OIL-DISPERSER is approved by:

- a. Warren Spring Laboratory (England).
- b. National Center for Marine Research (Greece).

BENEFITS

- Eliminates pollution of rivers and streams.
- Eliminates fire hazard around docks and piers.
- Eliminates nuisance and contamination problems.
- Reduces hazard of spill where aquatic life is concerned.
- Reduces clean-up time after accidental spill.
- Reduces contamination due to faulty oil-water separators.

HEALTH SAFETY

Please refer to the Material Safety Data Sheet and Product Label for specific information.

LIMITATION OF LIABILITY
